INSTRUMENT SOCIETY OF AMERICA

# ISA TRANSACTIONS

## EDITOR-IN-CHIEF

Prof. Gerald E. Dreifke  
*Saint Louis University*

## MANAGING EDITOR

James E. French  
*Instrument Society of America*

### EDITOR — MEASUREMENT APPARATUS

Prof. James M. Mozley  
*State University of New York*

### EDITOR — DATA HANDLING & COMPUTATION, AUTOMATIC CONTROL SYSTEMS

Prof. Thomas J. Higgins  
*University of Wisconsin*

### EDITOR — MEASUREMENT APPLICATIONS

Kenneth E. Kissell, Research Physicist  
*Aerospace Research Laboratories, U.S. Air Force*

### EDITOR — SURVEYS & REVIEWS

Theodor A. Dukes, Research Engineer  
*Princeton University*

Volume 6      1967

*Distributed by*

**PLENUM PRESS**

227 West 17th Street, New York, N. Y. 10011

All ISA TRANSACTIONS material has been selected on the basis of significant contribution to the technology. In every instance papers have been referred to the respective authors to reflect additional progress which may have occurred subsequent to original preparation.

*Library of Congress Catalog Card Number 62-13600*

ISA TRANSACTIONS is printed and distributed quarterly by  
Plenum Press, 227 West 17th Street, New York, N. Y. 10011

**ANNUAL SUBSCRIPTION  
(4 ISSUES)**

**\$28.00 domestic                            \$33.00 foreign**  
**ISA members: \$15.00**

*Printed in the United States of America*

# CONTENTS

Volume 6

1967

## Number 1

<b>Magnetostrictive Liquid-Level Sensors</b>	1	<b>Structural Stress Measurements with an Infrared Radiometer</b>	49
by F. L. Ryder <i>Simmonds Precision Products, Inc., Long Island City, New York</i>		by Milo H. Belgen <i>North American Aviation, Inc., Columbus, Ohio</i>	
<b>A Semiconductor Combustion Pressure Transducer for Rocket-Motor Instability Studies</b>	9	<b>Quadratic Optimization of Linear Discrete Systems by Elementary Matrix Theory</b>	54
by Julian Delmonte <i>Electro-Optical Systems, Inc., A Subsidiary of Xerox Corp., Pasadena, California</i>		by James A. Cadzow <i>State University of New York at Buffalo, Buffalo, New York</i>	
<b>A New Thermal Radiative Flux Gage</b>	15	<b>The Study of a Forced-Air Heating System Using Control System Techniques</b>	59
by Robert G. Hardy and David A. Paddock <i>The Air Preheater Company, Inc., Wellsville, New York</i>		by Louis F. Kazda and Ronald L. Spooner <i>University of Michigan, Ann Arbor, Michigan</i>	
<b>4 π Gravitational Compensator</b>	20	<b>Optimum Sampled-Data Control Systems with Quantized Control Function</b>	65
by Edward W. Johanson, William P. McDowell, Oscar D. Despe, and Gerald A. McGinnis <i>Argonne National Laboratory, Argonne, Illinois</i>		by M. Kim and K. Djadjuri <i>Cornell University, Ithaca, New York</i>	
<b>Systems Aspects of Solid-State Differential Amplifiers</b>	25	<b>Feedforward Control Synthesis for Multicomponent Distillation: II. Application of Theory to Selected Feedforward Control Problems</b>	74
by Richard H. Thomas <i>IBM Corporation, Rochester, Minnesota</i>		by T. W. Cadman; R. R. Rothfus, and R. I. Kermode <i>University of Maryland, College Park, Maryland; Carnegie Institute of Technology, Pittsburgh, Pennsylvania</i>	
<b>A Mechanical Shock Filter</b>	31	<b>Book Reviews</b>	82
by Lawrence H. Bakken and Howard C. Merchant <i>Sandia Corporation, Livermore, California</i>		<b>About the Authors</b>	85
<b>Investigation of Arc Jet Temperature-Measurement Techniques</b>	35		
by Frank P. Incropera and George Leppert <i>Stanford University, Stanford, California</i>			
<b>Instrumenting Models for Aerodynamic Heat-Transfer Studies Involving Transient Heating Rates</b>	42		
by William D. Harvey <i>NASA-Langley Research Center, Hampton, Virginia</i>			

## Number 2

<b>The Use of Computers in Communication Systems</b>	87	<b>On the Problems of Measuring Transient Temperature in Cryogenic Fluids</b>	133
by William O. Baker <i>Bell Telephone Laboratories, Inc., Murray Hill, New Jersey</i>		by C. E. Miller and T. M. Flynn <i>National Bureau of Standards, Boulder, Colorado</i>	
<b>Wavelength-Independent, Portable Radiometer</b>	94	<b>Stability and Control of Gyroscopic Bodies with Two Degrees of Freedom</b>	139
by Gerald D. Milam and Richard W. Treharne, Jr. <i>Charles F. Kettering Research Laboratory, Yellow Springs, Ohio</i>		by Allen G. Lindgren and Michael P. Feder <i>University of Rhode Island, Kingston, Rhode Island</i>	
<b>Effect of Excitation on X-Ray Emission Intensities</b>	99	<b>A Comparison of Time-Optimal Dual and Single Control of a Second-Order Control System</b>	147
by Frank Bernstein <i>General Electric Company, Milwaukee, Wisconsin</i>		by W. E. Meserve and David Jordan <i>Cornell University, Ithaca, New York; Griffiss Air Force Base, Rome, New York</i>	
<b>Local Density Determinations in Rarefied Gas Flows by Measuring the Large-Angle Single-Scattering from an Electron Beam</b>	103	<b>Optimization of Time-Dependent Systems by Dynamic Programming</b>	157
by Juliusz J. Grodski and B. W. Schumacher <i>Ontario Research Foundation, Toronto, Canada</i>		by Kan Chen and K. H. Bhavnani <i>Stanford Research Institute, Menlo Park, California; Honeywell, Inc., Waltham, Massachusetts</i>	
<b>A Continuous Adiabatic Calorimeter for Quantitative Thermal Analysis</b>	111	<b>A Mathematical Model of Soaking Pits</b>	162
by L. C. Hoagland, F. deWinter, and A. R. Reti <i>Dynatech Corporation, Cambridge, Massachusetts</i>		by E. Y. Kung, J. R. Dahm; and G. B. DeLancey <i>Jones &amp; Laughlin Steel Corporation, Pittsburgh, Pennsylvania; University of Pittsburgh, Pittsburgh, Pennsylvania</i>	
<b>Radiant Heat Source Facility for Calibration and Simulation Testing</b>	122	<b>Process Models for a Cyclic Catalytic Gas Reformer</b>	169
by L. K. Holtermann <i>Heat Technology Laboratory, Inc., Huntsville, Alabama</i>		by R. L. Zahradnik, D. H. Archer; and R. R. Rothfus <i>Westinghouse Research Laboratories, Pittsburgh, Pennsylvania; Carnegie Institute of Technology, Pittsburgh, Pennsylvania</i>	
<b>Surface Catalycity Effects on Heat Flux Measurements</b>	127	<b>About the Authors</b>	177
by J. E. Arnold and J. W. Baughn <i>Atomics International, Canoga Park, California</i>			

## Number 3

<b>Differential RF Voltage Comparator</b>	181	<b>A Controller Design Method for Linear Feedback Control Systems with Transport Lag by Parameter Plane and Dominant Root Methods</b>	225
by R. E. Calhoun <i>North American Aviation, Inc., Downey, California</i>		by Lawrence Eisenberg <i>Newark College of Engineering, Newark, New Jersey</i>	
<b>A Heat-Flux Gage for Use on Recessive Surfaces</b>	188	<b>Linear Feedforward Control of a Continuous-Flow, Stirred-Tank Reactor</b>	234
by Herbert Yanowitz and Paul Beckman <i>City University of New York, New York, New York; High Temperature Instruments Corp., Philadelphia, Pennsylvania</i>		by T. W. Cadman; R. R. Rothfus, and R. I. Kermode <i>University of Maryland, College Park, Maryland; Carnegie Institute of Technology, Pittsburgh, Pennsylvania</i>	
<b>The Measurement of Instantaneous Power System Frequency</b>	194	<b>Calibration of Optical Pyrometers</b>	242
by Věnceslav Kroupa <i>Czechoslovak Academy of Sciences, Prague, Czechoslovakia</i>		by William T. Gray <i>Leeds &amp; Northrup Company, North Wales, Pennsylvania</i>	
<b>Nuclear Measurement of Carbon in Bulk Materials</b>	200	<b>Response of Pneumatic Pressure-Measurement Systems to a Step Input in the Free Molecule, Transition, and Continuum Flow Regimes</b>	252
by Robert F. Stewart <i>Bureau of Mines, U. S. Department of the Interior, Morgantown, West Virginia</i>		by Jesse Hord <i>National Bureau of Standards, Boulder, Colorado</i>	
<b>Digital Computer Compensation of Strain Gage Data</b>	209	<b>About the Authors</b>	261
by A. W. Langill, Jr. <i>Aerojet-General Corporation, Sacramento, California</i>			
<b>Time-Domain Model of an AC Carrier-Control System</b>	217		
by Norman J. Bergman and H. R. Martens <i>State University of New York, Buffalo, New York</i>			

## Number 4

<b>Comparator for Calibration of Inductive Voltage Dividers from 1 to 10 KHz</b>	263	<b>Minimum Weighted Norm Control for Discrete Systems</b>	307
by Wilbur C. Sze <i>National Bureau of Standards, Washington, D.C.</i>		by James A. Cadzow <i>State University of New York, Buffalo, New York</i>	
<b>Precision Direct Reading AC Thermo-Ammeter</b>	268	<b>Fixed-Time Fuel-Optimal Control of Linear State-Constrained Systems by Use of Linear Programming Techniques</b>	311
by Kenneth J. Koep and Peter Goitiandia <i>Weston Instruments, Inc., Newark, New Jersey</i>		by A. Frederick Fath and Thomas J. Higgins <i>Boeing Scientific Research Laboratories, Seattle, Washington; University of Wisconsin, Madison, Wisconsin</i>	
<b>The Radioactive Voltage Standard</b>	273	<b>Direct Digital Control Algorithm with Antiwindup Feature</b>	317
by David W. Braudaway <i>Sandia Corporation, Albuquerque, New Mexico</i>		by Harry A. Fertik and Charles W. Ross <i>Leeds &amp; Northrup Company, Systems Analysis Department, North Wales, Pennsylvania</i>	
<b>Precision Zener References: Selection and Field Performance</b>	278	<b>Analysis of Smith Linear Predictor Control Systems</b>	329
by Peter Richman <i>Consulting Electronics Engineer, Lexington, Massachusetts</i>		by Lawrence Eisenberg <i>Newark College of Engineering, Newark, New Jersey</i>	
<b>A Comparator for Thermal AC-DC Transfer Standards</b>	286	<b>Dynamics and Control of Submerged Vehicles</b>	335
by Raymond S. Turgel <i>National Bureau of Standards, Washington, D.C.</i>		by Allen G. Lindgren, Daniel B. Cretella; and Anthony F. Bessacini <i>University of Rhode Island, Kingston, Rhode Island; Naval Underwater Weapons Station, Newport, Rhode Island</i>	
<b>Length Measurement and Laser Wavelength Stability</b>	293	<b>Probabilistic Feedback</b>	347
by Klaus D. Mielenz <i>National Bureau of Standards, Washington, D.C.</i>		by Wade H. Foy, Jr. <i>Stanford Research Institute, Menlo Park, California</i>	
<b>The Use of Rotational Viscometers with Non-Newtonian Liquids</b>	298	<b>Book Reviews</b>	356
by P. T. Eubank and B. F. Fort <i>Texas A &amp; M University, College Station, Texas; Ethyl Corporation, Baton Rouge, Louisiana</i>		<b>About the Authors</b>	357
<b>Detection of Blisters and Blows in Plywood</b>	303	<b>Author Index</b>	359
by J. T. Collins <i>Automation Industries, Inc., Boulder, Colorado</i>		<b>General Subject Index</b>	360
